

STS-118

The Shuttle STS-118 mission has seen, after more than 20 years, the explosion of Challenger (STS-51 L) Shuttle, the completion of the program “Teacher in space” with the flight by the astronaut/teacher Miss Barbara Morgan.

The program desired by then American President Ronald Reagan.

The flight towards the ISS was also a chance to supply the station with some material and provisions.

The book, A4 format paper and made of 276 pages, is rich in pictures, drawings and information/data which retrace the whole mission from the first preparation steps and during the flight in orbit.
